

# Contents

## Chapter 1:

### DNA Computing and P-Systems

- G. Păun  
*From Cells to Computers: Computing with Membranes (P-Systems)* 9
- R. Siromoney  
*Distributed Circular Systems* 41
- P. Bonizzoni, G. Mauri, C. Ferretti, and R. Zizza  
*Separating some Splicing Models* 55
- C. Zandron, G. Mauri, and C. Ferretti  
*Universality and Normal Forms on Membrane Systems* 61

## Chapter 2:

### CD Grammar Systems

- E. Csuhaj-Varjú  
*Grammar Systems: 12 Years, 12 Problems (Short version)* 77
- T. Bălănescu, M. Gheorghe, and M. Holcombe  
*A Subclass of Stream X-machines with Underlying Distributed Grammars* 93
- H. Fernau, M. Holzer, and R. Freund  
*Cooperating Distributed Grammar Systems with Exhausting Resources* 113
- K. Krithivasan and M. Sakthi Balan  
*Distributed Processing in Deterministic PDA* 127
- V. Manca  
*Logical Representations of Grammatical Systems* 147
- V. Mitrană  
*Parsability Approaches in CD Grammar Systems* 165

## Chapter 3:

### Colonies and PC Grammar Systems

- J. Gašo  
*Unreliable Colonies - the Parallel Case* 189
- J. Kelemen  
*A Note on Colonies* 203
- Gy. Vaszil  
*Problems and Recent Results Concerning Parallel*

<i>Communicating Lindenmayer Systems</i>	215
H. Fernau	
<i>PC Grammar Systems with Terminal Transmission</i>	229
P. J. Abisha, K. G. Subramanian, and D. G. Thomas	
<i>Pure Pattern Grammars</i>	253
Chapter 4:	
<b>Eco-Grammar Systems and Applications of Grammar Systems</b>	
B. Cases and M. Alfonseca	
<i>Eco-Grammar Systems Applied to the Analysis of the Dynamics of Population in Artificial Worlds</i>	265
M. D. Jiménez-López, and C. Martín-Vide	
<i>Grammar Systems and Autolexical Syntax: Two Theories, One Single Idea</i>	283
P. Sosík	
<i>Conditional Tabled Eco-Grammar Systems and Random Context Grammars</i>	297
M. Neubauer and M. Summerer	
<i>A Graph Controlled Array Grammar System with Predefined Teams for the Recognition of Hand-written Characters</i>	309
S. Ewert and T. Wessels	
<i>Distributed Processing of Random Context Picture Grammars</i>	329
Chapter 5:	
<b>Other Models of Computing</b>	
M. Holcombe	
<i>X-machines in Computing, Biology and Art</i>	343
W. Kuich	
<i>Full Abstract Families of Tree Series II</i>	347
G. Niemann	
<i>Regular Languages and Church-Rosser Congruential Languages</i>	359
R. Freund, L. Staiger	
<i>Communicating Machines on <math>\omega</math>-Words</i>	371
